

China International Filtration and Separation Industry Exhibition (FILEXPO 2011)

Oct. 10~12, 2011

Shanghaimart (No.99 Xingyi Road)

Invitation to Attend the FILEXPO 2011

Exhibition summary highlights

With the rapid development of the global energy and environment protection industry and accelerated new energy project, low carbon and environmental protection concepts have taken root in the hearts of the people. The 12th five-year plan attaches more importance to the sustainable development. The blue print depicted by the new five-year plan has not only brought about huge market and business opportunities for the filtration and separation industry, explored unlimited development space for the industry but also brought about rare opportunities for manufacturing enterprises.

The FILEXPO 2010 was hosted in Shanghaimart successfully, with an exhibition area of 5,000 square meters. Around one hundred enterprises attended the exhibition. Its professionalism and popularity has been recognized by professionals both from home and abroad and has attracted great attention.

China International Filtration and Separation Industry Exhibition (FILEXPO 2011) will be held from Oct. 10~12, 2011 at Shanghaimart. We will summarize experiences and squarely face the shortages. The new exhibition will lay stress on the organization work of domestic and overseas delegations attending the exhibition, organize the international and domestic audience properly while facing the international and domestic markets to push the exhibition to a new level. We believe that the exhibition will be a grand industry gathering elites and fine products under the strong support and guidance of industry departments and associations in the industry!

Exhibition news

- ◆ Exhibition installation period: Oct. 8-9, 2011
- ◆ Exhibition time: Oct. 10-12, 2011
- ◆ Exhibition address: Shanghaimart (No.99, Xingyi Road)

Professional and internationalized fluid exhibition to create business opportunities!

- ◆ Exhibition area: 10,000 square meters (expected)
- ◆ Audience number: 10,000 person times (expected)
- ◆ Organizer: China Fluid Engineering Society
Separation Machinery Commission of China Fluid Engineering Society
- ◆ Undertaker: Shanghai CG Exhibition Services Co., Ltd
- ◆ Supporters: Filtration & Separation Association of Xinxiang
Hefei General Machinery Research Institute of Filtration and Separation Machinery
American Filtration & Separation Society IFAI

Exhibiti classification

- ◆ various fiber filter media (such as natural fiber, glass fiber, synthetic fiber, metal fiber and mineral fiber etc are manufactured by papermaking, nonwoven needle punched, melt blown, spun bond, thermal bonding and weaving and knitting etc), metal sintering, ceramics sintered filter media, a variety of composite filter media.
- ◆ Filtration and separation machinery and equipment (vacuum filter, filter press, cartridge and bag filter, bag filter press, frame and box-type filter press, multi-function filter, a variety of centrifuges such as three-foot centrifuge, vertical centrifuge, horizontal screw settling centrifuge, disc centrifuge, centrifuge by scraper unloading and piston pushing, tubular-bowl centrifuge etc.).
- ◆ Air and gas filters and systems
- ◆ Oil and liquid filtration devices and accessories
- ◆ Sewage treatment equipment, water treatment equipment, (microfiltration, ultra-filtration, nano-filtration, RO) and equipment, filter media and filter aid;
- ◆ Various filter elements (yarn burning, metal sintering, melt-blown etc.)
- ◆ A variety of filtering membrane and membrane filtration devices, air bags and complete equipment, various auxiliary equipment and separation equipment for the filtration industry
- ◆ Clean room and associated equipment and systems
- ◆ Various filter bags, bag type dust collectors, systems and assemblies
- ◆ Electrostatic dust remover
- ◆ Nanometer filter media, filter media processing equipment (pleating, filter element molding, compounding, coating, laminating etc.);
- ◆ Auxiliary equipment: Vacuum pump, water pump, mud pump, air compressor, valves,

piping and accessories

- ◆ Test instruments and apparatuses
- ◆ Consulting, project contracting, information and software development, publishing, etc.

Reasons for joining the FILEXPO

1. It is a professional exhibition platform built by the authoritative body of the state filtration and separation industry. The undertaker has more than ten years' experience in exhibition and symposium operation. It also has rich customer information resources, and mature marketing experiences, enjoying high popularity and influences in the fluid machinery industry.
2. It transcends simple exhibition services to provide in-depth business services. It will provide enterprises with diversified services including trade matching, technology exchange and invitation from the buyer etc, making it a grand industry gathering in an integrated exhibition and trade service mode;
3. The exhibition integrates symposiums, forums, special procurement fair and business consultation into a whole, with diversified contents; therefore, it is a grand event insiders shall not miss.

Expected benefits for joining the fluid

1. Exchange views with overseas filtration and separation machinery purchasers and manufacturers face to face;
2. Establish the company brand image and explore domestic and overseas filtration and separation product markets;
3. Experience the multi-channel successful distribution mode of filtration and separation products;
4. Maintain and strengthen your sales networks, new and old customers;
5. Listen to overseas experts talk about the overseas filtration and separation market dynamics and exchange views with them on future development trends;
6. Face end consumers and acknowledge the market feedback before a new product is launched to acquire market information rapidly;

Value-added services to exhibitors

- ◆ The organizer will provide the exhibitor-buyer matching system free of charge to enable the exhibitors to get contacted with professional visitors of the FILEXPO Fair and the pre-registered visitors before the exhibition so as to acquire more trade opportunities;
- ◆ The organizer will recommend outstanding exhibitors on the admissions and invitation letters, which will be sold through various channels;
- ◆ The organizer will provide some exhibitors with buyer mail invitation services free of charge to facilitate the exhibitors to carry out buyer invitation work before exhibition;
- ◆ The organizer will publish exhibit introduction on major industry media for exhibitors free of charge to introduce and promote their exhibits;
- ◆ The organizer will recommend outstanding exhibitors on the exhibition website free of charge to promote their popularity and influences;
- ◆ The organizer will mail thousands of copies of “Exhibit introduction” brochures before exhibition to buyers, in which major exhibitors will enjoy free exhibit picture promotion in the “Exhibit introduction”.
- ◆ The organizer will help provide hotel booking services and customers will be entitled to the special preferential prices of the exhibition;
- ◆ The organizer will link the all exhibitors’ information to the official website of the exhibition after it ends to make it last forever.

Events

To strengthen exchange and cooperation between industries, we will host related technology forums on filtration and separation during the exhibition period, highlighting the latest liquid-solid, air particle separation (dust and gas filtration), during which, technology promotion and transfer will become the focal points. Rich contents of forums which will be hosted simultaneously will cover every field from design to improvement, purchasing, selling and to research and development of services of filtration equipment etc, including hot topics such as application of filtration and settlement methods to promote solid and liquid separation and purify air by filtration, electrostatic dust removal, deposit and washing etc, basic gas membrane separation technologies and new equipment etc.

Attendants may learn about the latest development of advanced separation proposals applied in different fields around various parts of the world, including mineral resource processing, biotechnologies, chemical, environmental projects and water purification etc. New product release conferences and technical seminars etc will be held simultaneously by filtration enterprises during exhibition.

Target audiences

Audiences from fields including chemical, petroleum, cement, papermaking, pharmacy, metallurgy, coal, mining, foundry, automotive, water treatment and environmental protection, machinery, refrigeration, plastics, hospital, textile, light industry, food, beverage, electroplating, national defense, construction, aviation and aerospace, electric and electronics, power plant and new composite materials etc, manufacturers, sales agents, international traders, import and export companies, related technicians, audiences from government departments etc.
